

Bio-Energy field-Analysis

energetic Evaluation (Stress-scan) with COSMIC-Tower Mini

Hello dear COSMIC Tower owners and users,

There is a method to show the energetic changes, which are made possible through the energetic field of the COSMIC-Tower.

You can use this method in the whole German-speaking area, as well as in many countries worldwide. An overview of all Bio-Well practitioners/users can be found at [here](#).

With the help of the Bio-Well Camera this is made possible and is used for Bio-Energy Field Analysis. This modern physical device measures the bio-photons and electrons emitted from our fingertips. Using the meridians, these scans can provide information about disturbances in the energy field and thus health problems. Thus, it provides data about the energy distribution in various organs (liver, heart, kidneys, etc.), glands (thyroid, hypothalamus, adrenal glands, etc.) and systems (immune system, nervous system, etc.) and identifies energetic imbalances.

Before and after images can be used to track the progress of treatment. The Bio-Well camera was developed by Prof. Konstantin Korotkov, a physicist at St. Petersburg University, and is used by scientists and health professionals around the world.

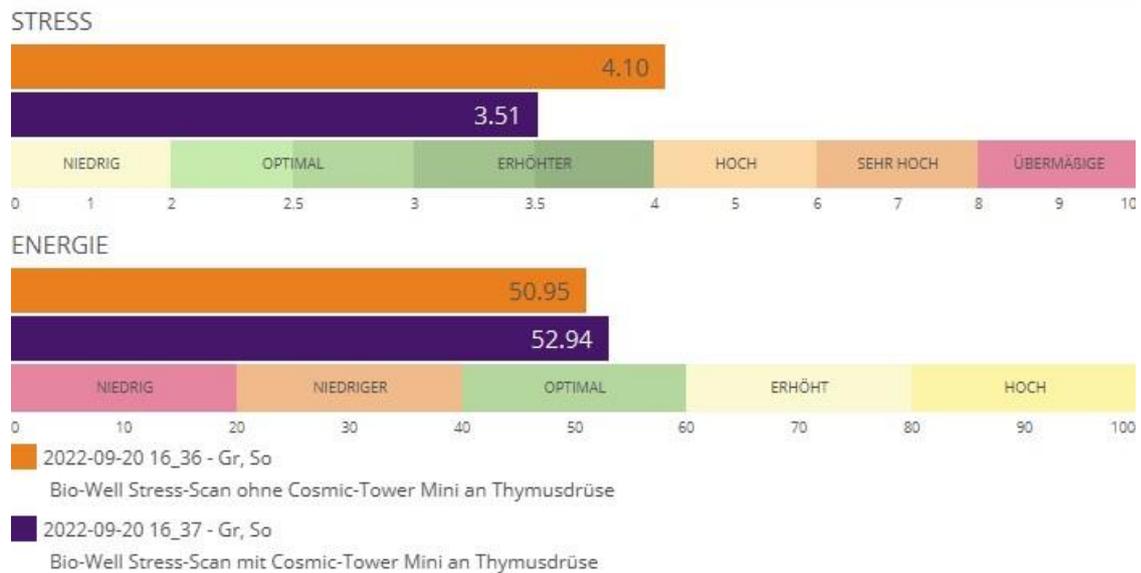

Features of the Bio-Well Camera:

- Capturing and displaying the human energy field.
- Detection of organs and systems with low energy reserves
- Detection of imbalances in organs and systems
- Information about the stress level
- Detecting the body's reaction to sports activity, nutritional supplements, flower essences, body code, electromagnetic radiation (cell phone)....
- Information about the energy distribution in the meridians
- Allocation of the energy levels of the chakras
- Creation of individual sound files for relaxation

You can find all Bio-Well practitioners/users [here](#)

We did a small energetic evaluation (Stress-Scan) with the Bio-Well camera in response of carrying a COSMIC-Tower Mini.

By means of the easy to perform stress scan, one can see that by holding the CT Mini to the thymus gland, the client's stress level decreased significantly (from 4.10 down to 3.51) and at the same time the client's energy level increased significantly (from 50.95 to 52.95).

Thus, one can clearly see that by holding the CT Mini to the thymus gland or wearing the CT Mini on the body, positive changes can be achieved on the energetic level.

It should be noted, that all evaluations using the Bio-Well Camera are always dependent on the individual client and represent only snapshots. More information* - see below.

***INFORMATION - PLEASE NOTE:**

In my descriptions, consultations, and applications I do not provide medical diagnoses, therapies, and treatments in the medical sense.

I am not a doctor and not a naturopath and I do not treat any diseases. Therefore, I do not give any diagnoses or therapeutic advice.

No ailments or diseases are treated, and no improvements of ailments or diseases are promised.

I explicitly point out that I do not have medical knowledge and skills.

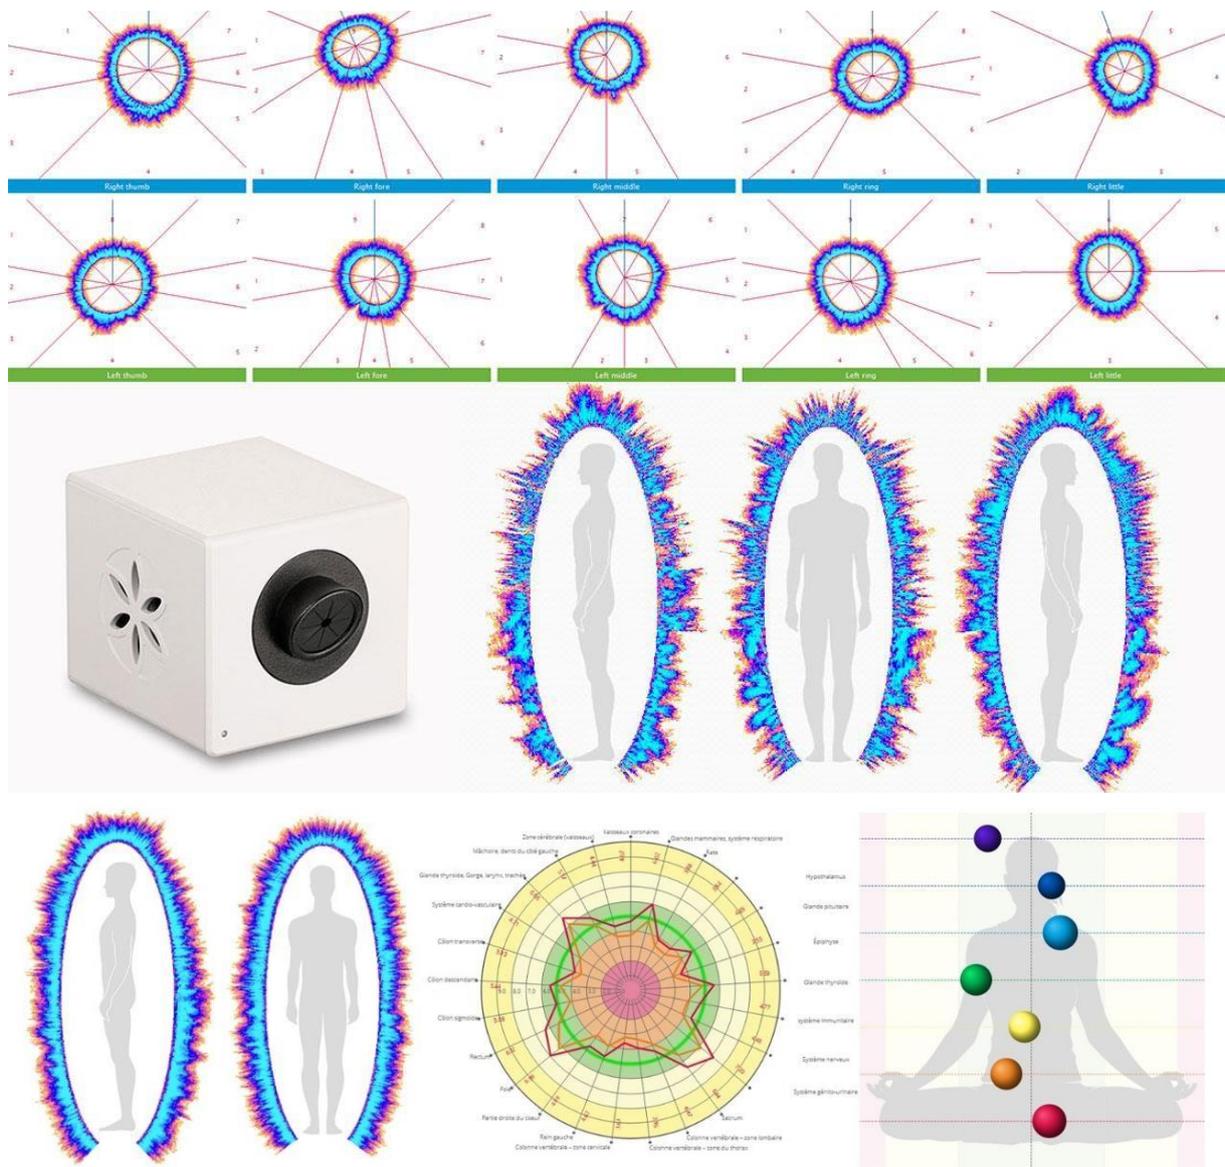

This means that my consultations cannot replace medical treatment. I consider cooperation with conventional medicine to be very important and necessary.

Please do not discontinue ongoing medical treatments, as well as medications in any case and do not postpone a necessary treatment by the doctor.

I do not make any healing promises and it is up to your free choice to use the products or to perform consultations, sessions.

My consultations, sessions and applications include actions to rediscover or regain self-healing powers or to strengthen your own self-healing powers on all levels. Depending on the objective, this serves the sole purpose of a non-specific health care, relaxation, well-being and / or personal development.

Here are some sample images of an evaluation using a Bio-Well camera:

If you have any questions or are interested in an evaluation with the Bio-Well camera, please feel free to contact the Bio-Well practitioners/users.

Kind Regards from Susanne
VITALIS-Balance
